(Bastos)

PRESENTATION AND OBJECTIVES

The seminar aims to bring together researchers to share the latest scientific advances and new practices in bioremediation, biomaterials, biodiversity conservation and the fight against climate change. The main objectives are to exchange knowledge through discussions on innovative solutions for treating environmental pollution through bioremediation; to promote biomaterials through the use of sustainable materials to reduce the ecological footprint; and to preserve biodiversity by sharing approaches for conserving and restoring ecosystems. Finally, fighting climate change by adopting adaptation and mitigation strategies in the face of global climatic challenges is a major preoccupation of this meeting.

INSTRUCTIONS FOR AUTHORS

Title: Centered, Times New Roman 14, bold.

Authors: Centered, Times New Roman 12, speaker's name underlined.

Affiliations: Centered, Times New Roman 10.

Email: Centered, Times New Roman 11.

Abstract: 300-350 words, justified, Times New Roman 12, 1.5 line spacing.

Keywords: 3-5 words, Times New Roman 12.

Language: English or French.

Posters: Size 80 cm x 100 cm.

REGISTRATION

Participants are invited to submit their abstracts and the registration form (in the same document) to the following e-mail :

isbc25@ummtto.dz

Importantes dates

*Deadline for submission of abstracts: **15/09/2025**

*Notification of acceptance: 01/10/2025

*Seminar date: 21-23/10/2025

Fees

Students: 3000 DA

Teachers: 7000 DA

Organizations: 10 000 DA
